*Bob MacDermott has a handicap...
a three handicap.*

He also has an upper and
lower limb prosthesis.

Get a Grip

Some believe, golf, to be the number one sport in the world. *The Troppman Grip*, which is designed specifically for the upper extremity amputee, ensures that the golf experience is an enjoyable one.

Development

For the upper extremity amputee, the terminal device should be flexible enough to allow for the wrist and forearm movements required during the golf swing and secure enough to keep the club in place.

In 1997, Troppman's developed a golf attachment which incorporates these principles and is made of a strong yet flexible composite material.

Whether you are a weekend golfer or a scratch golfer like Bob, you will find *The Troppman Grip* to be of benefit to your game.

Warranty

The Troppman Grip is warranted for a period of 120 days from the date of purchase. The warranty covers failures due to defects in workmanship and materials only.

Any alterations to *The Troppman Grip* by any person other than an employee of Troppman Prosthetics Ltd. voids any warranty.
